The following statements regarding deposits of uranium in Poland were made by Professor Bogdanowicz, director of the Geological Institute in Warsaw:

1. Professor Bogdanowicz stated that Poland has very rich deposits of uranium at Krzywatzka near Jelenia Gora (Hirschberg, about 95 kms S.W. of Wroclaw).
2. The exploitation of uranium was started by the Germans, but they abandoned it on account of the war and partly due to damage suffered by the mines.
3. Professor Bogdanowicz further stated that the Polish Government is repairing the damage to the mines but that they had not yet started to work them.
